

CALL FOR CHAPTER

Book Series on **TÜRKİYE'S ROLE IN A CHANGING WORLD**

- **Turkish Values-Based Foreign Policies -**
- **Turkish Values-Based Security and Defense -**

OVERVIEW

Türkiye is reorganizing its domestic dynamics and global positioning at a time when the western-centered principles of globalization and liberal democracy are facing their greatest challenges. In a rapidly changing world where new powers and centers are rising, the *raison d'être* or practices of old institutions are being called into question, and new types of challenges are emerging with global developments, building a new ecosystem in Turkish foreign policy by embracing its core values is not only about doing what is considered right or supporting institutions and norms. Rather than relying on the alliances it is in or the friendships it has cultivated, Türkiye's posture going forward will depend on its future contributions to global solutions. It is related where the current international order will evolve and Türkiye's unique position in a new or renewed system.

Securing national interests in an uncertain world means transforming usual policies and conventional approaches to help create a framework for an international system that can produce useful solutions to the challenges of articulating and protecting the self-assets of people around the world. A dominant role cannot be achieved through an operational approach that prioritizes short-term, narrowly defined security and diplomatic gains.

Recognizing the shortcomings of the current system in which great powers draw borders and define roles, Türkiye has the opportunity to use its capacity to create a strong vision that has a significant impact on inclusive representation and justice at the international level, rooted in its own identity and individuality.

PURPOSE

It is clear that the Turkish state tradition, which has passed through different periods throughout history, has accumulated the capacity to create its own culture. National values, which play an important role in shaping this culture, are also the basis for global assertion. Pursuing an active policy built on national values will be seen as a focus of power at a time of uncertainty about Türkiye's position and future role in the world.

Türkiye's willingness to use existing instruments of influence creatively and meaningfully and to secure and establish new ones to shape the future direction of the international system is concentrated in the core policy areas where it is strong or believes it should be strong.

In this framework, the place of Türkiye's unique approaches, theses and practices, together with global values such as democracy, human rights, equality and justice, in all approaches and decisions related to diplomacy and security in the new system fiction will be evaluated equally on the basis of academic validity in this study. This evaluation will support the understanding of Türkiye's claim in different layers. In addition, in a period when the global system is being reinterpreted, it will be tried to reveal where Türkiye is in the idea and execution processes. This study, which will serve as a source for similar studies abroad, will ensure that policies have an international presence and support the development of policies with different visions.

METHOD

The "Türkiye's Role in a Changing World" book series will consist of books focusing on foreign policy, security and defense. These books will bring together facts and recommendations on how Türkiye can put its national values at the heart of its security, defense and foreign policy in the coming years. The chapters, that written by academicians and researchers, as well as experts such as civil society representatives, ambassadors, national authorities, policymakers, members of the media, etc., will cover topics that underpin Türkiye's ambitions to shape not only national policies but also global transformation in the new era.

The study, which will be published by DİPAM Publications, which has the status of an International Publishing House, has the validity of YÖK (Turkish Higher Education Council) standards. It will be prepared in English and distributed internationally in order to increase the accessibility of the content and create a global impact.

The content plans of the books have been prepared and chapter authors will be determined both by invitation and call for papers. The chapters that will be accepted in accordance with this plan, which is focused on a certain flow and result, will be examined and evaluated in norms such as form, scope, originality, technical and/or research depth, subject transfer framework.

Each chapter should be between 5000-6000 words and “APA 7.0” should be used as the referencing method. Detailed information will be shared with those whose abstracts are accepted.

ABSTRACT SUBMISSION

Chapters in the book may have one or more authors. Authors should act according to mentioned important dates in the book chapter application and writing process. Authors who are accepted in line with the submitted abstract and will be included in the book will be charged one book fee and will be given a copy of the book to be published.

Abstracts should cover the title, purpose, approach and problematic of the selected chapter, as well as possible topics to be addressed in the full text. Abstracts should be between 500-750 words. A short CV and contact information should be submitted along with the abstract via publication@dipam.org email address.

Abstract submission deadline: ~~30.11.2023~~ **31.12.2023**

Announcement of evaluation results: ~~15.12.2023~~ **15.01.2024**

Full text submission: 15.04.2024

Publication date: 07.2024
